

PRE-STUDENT TEACHING PRACTICUM
Weekly Progress Report

Week of 2/22 - 2/26

Student's Name Roxanne Boardman

Teacher's Name MR. Lierman

Grade Level/Subject Life = 7th
9th-Bio Adv Bio - 11/12

Hours Spent This Week High = 8 Jr High = 7

School District Shullsburg

Pre-Student Teaching Experiences (What kinds of things did you do, hear, see?)

- I was able to teach a lesson in freshman Biology on Punnett squares
- 7th grade student went to the FFA petting zoo during class. Cooperating teacher brought it back to relevant to class, study of animals, where food comes from. Current Science Report.

Student's Comments (What are your reactions/questions related to the above?)

- I was nervous teaching, but felt I knew the topic well. I need to slow down. Think of more higher level questions; although lesson may not have allowed for it.
- Any penalty for not completing Current Science Reports?

2/2

Cooperating Teacher's Comments (e.g., points covered in conference; strengths noted; areas suggested for study, action, etc.)

Great job leading the class through the problem solving activity. Will try to get Roxanne involved in more guided practice activities. *→ good!*

Conference held on 2/25/10
