

PRE-STUDENT TEACHING PRACTICUM

Weekly Progress Report

Week of 3/15 - 3/19

Student's Name Roxanne Boardman

Teacher's Name Mr. Lierman

Grade Level/Subject 9th Bio, 7th Life, Adv. Bio

Hours Spent This Week 20

School District Shullsburg

Pre-Student Teaching Experiences (What kinds of things did you do, hear, see?)

I designed a lesson for 9th Biology on Selective Breeding and was able to take students to computer lab to look up websites that provided examples on my lesson.

I also followed the Freshman to other classes to see how they meet with other teachers.

Student's Comments (What are your reactions/questions related to the above?)

The students know which teachers they can get along with & those they can't. Interest's though that when asked their fav teachers, those were the ones with great classroom management. They did not like 2 teachers and I observed both, and they lacked classroom management. Students overtalked those teachers, blew them off.

2/2

Cooperating Teacher's Comments (e.g., points covered in conference; strengths noted; areas suggested for study, action, etc.)

Roxanne prepared a lesson pertaining to Selective breeding and involved computer research. The lesson was well conceived and received by the students.

Conference held on 3-16-10
